

MATERIAL SAFETY DATA SHEET

Page 1 of 5

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Loctite(R) Black Rubber Sealant
 Item No.: 80236
 Part No.: PR-1
 Product Type: Adhesive

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Light aliphatic solvent naphtha	64742-89-8	25-30
METHYL ETHYL KETONE*	78-93-3	25-30
Synthetic Rubber	Proprietary	Unknown
CYCLOHEXANE*	110-82-7	1-5
ZINC OXIDE*	1314-13-2	Unknown

* This component is listed as a SARA Section 313 Toxic Chemical.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Light aliphatic solvent naphtha	None	None	300ppm
METHYL ETHYL KETONE	200 ppm TWA 590 mg/m3	200 ppm TWA 590 mg/m3	None
CYCLOHEXANE	100 ppm TWA	300 ppm TWA 1050mg/M3	None
ZINC OXIDE	5 mg/m3 fume 10 mg/m3 dust	10 mg/m3 dust 5 mg/m3 respir	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)
METHYL ETHYL KETONE	300 ppm 885 mg/m3	300 ppm 885 mg/m3
ZINC OXIDE	10 mg/m3 fume	10 mg/m3 fume

3. HAZARDS IDENTIFICATION

Toxicity: Irritating to the eyes, skin, and respiratory tract. Exposure to vapor or mist is possible. Short-term inhalation toxicity is low. Breathing small amounts during normal handling is not likely to cause harmful effects; breathing large amounts may be harmful. Single dose toxicity is low. Swallowing small amounts during normal handling is not likely to cause harmful effects; swallowing large amounts may be harmful. Some reports have associated repeated and prolonged exposure to solvents with permanent brain damage and nervous system damage (sometimes referred to as "solvent" or "painter's syndrome"). Symptoms reported included fatigue, concentration difficulties, anxiety, depression, rapid mood swings, and short-term memory loss. These reports are not clear with regards to the type of solvents that cause these symptoms. There also is controversy among scientists as to whether the condition exists or is caused by this type of product. Since many diseases cause some or all of these symptoms, a doctor should be consulted if any symptoms appear. This material (or a component) has been shown to cause harm to the fetus in laboratory animal studies. Harm to the fetus occurs only at exposure levels that harm the pregnant animals. The relevance to these findings to humans is uncertain. Overexposure to this material (or its components)

MATERIAL SAFETY DATA SHEET

Page 2 of 5

Product Name: Loctite(R) Black Rubber Sealant
 Item No.: 80236

3. HAZARDS IDENTIFICATION

(continued)

Primary Routes of Entry:
 Signs and Symptoms
 of Exposure:

has been suggested as a cause of the following effects in laboratory animals: 1) Mild, reversible liver effects/damage 2) Mild, reversible kidney effects/damage
 Based on animal studies, exposure to METHYL ETHYL KETONE (MEK) increases the onset of peripheral neuropathy caused by exposure to Methyl Butyl Ketone (MBK) and/or N-HEXANE, and/or Ethyl Butyl Ketone. MEK, alone, has not been shown to cause peripheral neuropathy.

Skin contact, ingestion, inhalation.

EYES: Exposure to liquid or vapor causes mild eye irritation. Symptoms may include burning, tearing, redness, stinging, blurred vision, and corneal injury.

SKIN: Exposure may cause mild skin irritation. Prolonged or repeated exposure may dry the skin. Symptoms may include redness, burning, drying, cracking and skin burns. Pre-existing skin disorders may be aggravated by exposure to this material. Skin absorption is possible, but harmful effects are not expected from this route of exposure under normal conditions of handling and use.

BREATHING: Symptoms are typically seen at air concentrations exceeding the recommended exposure limits. Symptoms of exposure may include: 1) Nasal and respiratory irritation (nose, throat, and lung)-pre-existing lung disorder, e.g. asthma-like conditions, may be aggravated by exposure to this material. 2) Central Nervous System (CNS) Depression/Effect (dizziness, drowsiness, weakness, fatigue, nausea, headache, possible unconsciousness, coma, and even death). 3) Cardiac arrhythmias (irregular heartbeat) 4) Cough

SWALLOWING: This material can enter the lungs during swallowing or vomiting and cause lung inflammation and/or damage. Aspiration of material into the lungs can cause chemical pneumonia which can be fatal. Symptoms of exposure may include: Gastrointestinal irritation (nausea, vomiting, diarrhea)

Existing Conditions
 Aggravated by Exposure:

Methyl ethyl ketone: Eye problems, skin and respiratory disorders.
 These or other components may also aggravate pre-existing disorders of these organs: liver, kidney.

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen		
		NTP	IARC	OSHA
Light aliphatic solvent naphtha	NTD	NO	NO	NO

Product Name: Loctite(R) Black Rubber Sealant
Item No.: 80236

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. This material is an aspiration hazard. If individual is drowsy or unconscious, place on left side with head down. Seek medical attention. If possible, do not leave individual unattended. Aspiration of material into lungs can cause chemical pneumonia, which can be fatal.

Inhalation: If symptoms develop, immediately move individual away from exposure and into fresh air. Seek immediate medical attention. Keep person warm and quiet. If person is not breathing, begin artificial respiration. If breathing is difficult, administer oxygen.

Skin Contact: Remove contaminated clothing. Flush exposed area with large amounts of water. If skin is damaged, apply a clean dressing and seek immediate medical attention. If skin is not damaged, wash exposed area with soap and water. If symptoms persist, seek medical attention. Launder clothing before reuse.

Eye Contact: If symptoms develop, move individual away from exposure and into fresh air. Flush eyes with water for at least 15 minutes while holding eyelids apart. Seek medical attention.

5. FIRE FIGHTING MEASURES

Flash Point: 4=F Method: Tag Closed Cup

Recommended Extinguishing Agents: Carbon dioxide, foam, dry chemical

Special Firefighting Procedures: Never use welding or cutting torch on or near drum (even empty) because product (even just residue) can ignite explosively. All five gallon pails and larger metal containers should be grounded and/or bonded when material is transferred. Material is highly volatile and readily gives off vapors which may travel along the ground or be moved by ventilation and ignited by pilot lights, other flames, sparks, heaters, smoking, electric motors static discharge, or other ignition sources at locations distant from material handling point. WARNING! Sudden release of hot organic chemical vapors or mist from process equipment operated at elevated temperature and pressure or sudden ingress of air into vacuum equipment may result in ignitions without the presence of obvious ignition sources. Published "autoignition" or "ignition" temperature values cannot be treated as safe operation temperatures in chemical processes without analysis of the actual processes conditions. Any use of this product at elevated temperature processes should be thoroughly evaluated to establish and maintain safe operation conditions. Hydrocarbon solvents are basically non-conductors of electricity and can become electrostatically charged during mixing, filtering or pumping at high flow rates. If this charge reaches a significantly high level, sparks can form that may ignite vapors of flammable liquids.

Hazardous Products formed by Fire or Thermal Decomp: Irritating organic vapors, oxides of carbon, hydrocarbons.

Unusual Fire or Explosion Hazards: None

Explosive Limits:
{% by volume in air}Lower 1%
{% by volume in air}Upper Not available

Product Name: Loctite(R) Black Rubber Sealant
Item No.: 80236

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Eliminate all ignition sources (flares, flames including pilot lights, electrical sparks.) Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source; dike area to prevent spreading, pump liquid to solvent tank. Remaining liquid may be taken up on sand, clay, earth, floor absorbent, or other absorbent material and shoveled into containers, which should be kept closed until disposal. Prevent run-off to sewers, streams or other bodies of water. If run-off occurs, notify proper authorities as required, that a spill has occurred

7. HANDLING AND STORAGE

Safe Storage: Store away from heat and flames.
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Keep container closed. Loosen closure cautiously before opening. Store in a cool, well ventilated place away from incompatible materials (oxidizing agents and acids). Keep away from heat, sparks and flame. Protect material from direct sunlight. Ground and bond containers when transferring materials. Empty containers may retain hazardous properties. Follow all MSDS/label warnings even after container is emptied.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Chemical splash goggles in compliance with OSHA regulations are advised; however, OSHA regulations also permit other types of safety glasses. Consult your safety representative for specific recommendations.
Skin: Wear resistant gloves. Consult your safety representative for specific recommendations. To prevent prolonged or repeated skin contact, wear impervious clothing and boots. Consult your safety representative for specific recommendations.
Ventilation: Sufficient to maintain vapor concentration below TLV and lower explosive limit. Explosion proof equipment should be considered. Local and general mechanical exhaust ventilation should be used.
Respiratory: A NIOSH/MSHA jointly approved air supplied respirator is advised in absence of proper environmental control.

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Black liquid.
Odor: Solvent
Boiling Point: 175°F
pH: Does not apply
Solubility in Water: Negligible
Specific Gravity: 0.97
Volatile Organic Compound (EPA Method 24) 57.2%; 555 grams per liter
Vapor Pressure: 78mm Hg
Vapor Density: 1.65
Evaporation Rate (Ether = 1) 47

10. STABILITY AND REACTIVITY

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: Strong oxidizers, acids

MATERIAL SAFETY DATA SHEET

Page 5 of 5

Product Name: Loctite(R) Black Rubber Sealant
Item No.: 80236

10. STABILITY AND REACTIVITY (continued)

Conditions to Avoid: Heat, sparks, flames, and other sources of ignition
Hazardous Decomposition Products (non-thermal): None

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Incinerate following EPA and local regulations.
EPA Hazardous Waste Number: D001/D035 - Hazardous waste per 40CFR 261.21 and a TCLP waste per 261.24/Methyl Ethyl Ketone.

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
Proper Shipping Name: Consumer Commodity (Not more than one liter);
Adhesives (More than one liter)
Hazard Class or Division: ORM-D (Not more than one liter);
Class 3, Packing Group II (More than one liter)
Identification Number: None (Not more than one liter);
UN 1133 (More than one liter)
Marine Pollutant: None
IATA
Proper Shipping Name: Adhesives
Class or Division: Class 3, Packing Group II
UN or ID Number: UN 1133

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.
Toluene

16. OTHER INFORMATION

Estimated NFPA(R) Code:
Health Hazard: 2
Fire Hazard: 3
Reactivity Hazard: 0
Specific Hazard: Does not apply

Estimated HMIS(R) Code:
Health Hazard: 2*
Flammability Hazard: 3
Reactivity Hazards: 0
Personal Protection: See Section 8.
